Mini Reviews in Medicinal Chemistry

The aim of Mini-Reviews in Medicinal Chemistry is to publish short reviews on the important recent developments in medicinal chemistry and allied disciplines.

Mini-Reviews in Medicinal Chemistry covers all areas of medicinal chemistry, including quantitative structure-function relationships, synthetic chemistry, bioorganic chemistry, drug absorption, drug distribution, drug metabolism, new and emerging drug targets, pharmacogenomics, drug safety profile and drug-induced liver injury (DILI), drug discovery toxicology, high-throughput screening, combinatorial chemistry, structural characterization and organic syntheses of naturally occurring compounds, ‘nanosystem and nanocarriers’, as well as chemical and analytical techniques used in rational drug design.

- Publishing Peer Reviewed Articles Rapidly
- Indexed in SCI Expanded, MEDLINE, Scopus, EMBASE, JCR/Science Edition and others
- FREE Online Trials for Institutions
