

Tentative Outline (Preliminary Proposal of Thematic Issue)

Special Thematic Issue for the journal Current Pharmaceutical Biotechnology

Title of the Thematic Issue: "Recent Advances in Cancer Immunotherapy"

Section Editor: Dr. Yujiang Fang

- **Scope of the Thematic Issue:**

Immunotherapy revolutionizes the treatment of malignancy. Remarkable advances have been made in cancer immunotherapy in recent years. Satisfactory clinical prognosis has been achieved in cancers such as bladder tumor, melanoma, and colon cancer. With current advances in medical technologies, newly identified tumor antigens promote the development of cancer precision medicine that will treat cancer patients accurately and individually. In this issue, besides including the reviews of the state of the art in cancer immunotherapy, we also discuss cancer precision medicine in some cancers.

Keywords: Cancer, Immunotherapy, cytokine, precision medicine, checkpoint inhibitors, tumor antigens

Sub-topics:

- Cytokine based Cancer immunotherapy
- Cancer precision medicine
- Checkpoint based Cancer immunotherapy

Schedule:

- Thematic issue submission deadline: **Dec 30th, 2023**
